DETAILED ACTION

1. This office action is in response to Applicant's amendment filed 30 May 2008.

Drawings

2. The drawings were received on 30 May 2008. These drawings are acceptable.

Allowable Subject Matter

3. Claims 1-9 are allowed. Claim 1 is the sole independent claim.
4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to anticipate or make obvious a power drill chuck having (1) "the rear sleeve is provided with piecewise annular holes on its rear end surface and a plurality of keys on its inner surface", (2) "a positioning sleeve is fixedly connected to the rear portion of the drill body", and (3) "a plurality of elastic impact members are mounted between the nut sleeve and the rear sleeve" and "being provided with a plurality of elastic deformation portions and a plurality of projecting keys", solely or in combination, with a power drill chuck having a drill body, a nut, jaws, a front sleeve, a rear sleeve, a nut sleeve and a rolling body.

Yang et al. (US 6,848,691) is the closest art of record.

Yang et al. '691 shows in Figures 1-1B, 2-2B and 4-8 a power drill chuck comprising a drill body (1), a nut (2), jaws (3), a front sleeve (5), a rear sleeve (4), a nut

sleeve (7) and a rolling body (9), wherein the three jaws are mounted respectively in three inclined holes which are trisection of the drill body. Yang et al. '691 further shows a nut thread (2-1) constitutes a thread drive together with a thread (33) of the jaws, the front sleeve is fixedly connected to the drill body, the nut sleeve is fixedly connected to the nut and extends backwards with a rear end of which a plurality of projecting keys (7-1,7-2,7-4) are provided. Yang et al. '691 further shows the rear sleeve being mounted around the rear portion of the nut sleeve and may rotate relative to the nut sleeve and the drill body.

Yang et al. '691 lacks a power drill chuck having (1) "the rear sleeve is provided with piecewise annular holes on its rear end surface and a plurality of keys on its inner surface", (2) "a positioning sleeve is fixedly connected to the rear portion of the drill body", and (3) "a plurality of elastic impact members are mounted between the nut sleeve and the rear sleeve" and "being provided with a plurality of elastic deformation portions and a plurality of projecting keys".

Although it is well known to have a power drill chuck with "a rear sleeve", "a positioning sleeve" and "a plurality of elastic impact members", there is no teaching in the prior art of record that would, reasonably and absent impermissible hindsight, motivate one having ordinary skill in the art to so modify the teachings Yang et al. '691, noting that in Yang et al. '691, the rear sleeve is a solid piece without piecewise annular holes on its rear end and without a plurality of keys on its inner surface, no positioning sleeve is present at all, and no plurality of elastic members are present at all, let alone mounted between the nut sleeve and the rear sleeve. Thus, for at least the foregoing

reasons, the prior art of record neither anticipates nor rendered obvious the present invention as set forth in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric A. Gates whose telephone number is (571)272-5498. The examiner can normally be reached on Mon-Thurs 8:45 - 6:15.
